

GENERAL INTRODUCTION

- Our Automatic Water Level Control Valve is patented product which is instead of traditional float valve. It automatically control the water supply and stop according the water level changes. It can solve the water leakage problem , save more than 60% water.

APPLICATION

- Water tank、 water tower、 livestock drinking、 air cooling、 hydroponics、 machinery、 humidifier、 swimming pool、 toilet 、 solar energy、 water heating boiler、 aquarium and other industrial applications etc

WORK PRINCIPLE

- When water level rises to water limited line, the Water Level Control Valve will stop supplying water immediately; when water level drop, the valve will start to supply water automatically.

WHY CHOOSE THIS?

NEW WATER LEVEL CONTROL VALVE

- ✓ Small Body
- ✓ Long Life
- ✓ Large Flow
- ✓ Never Rust
- ✓ Easy to Maintain
- ✓ Wide Application

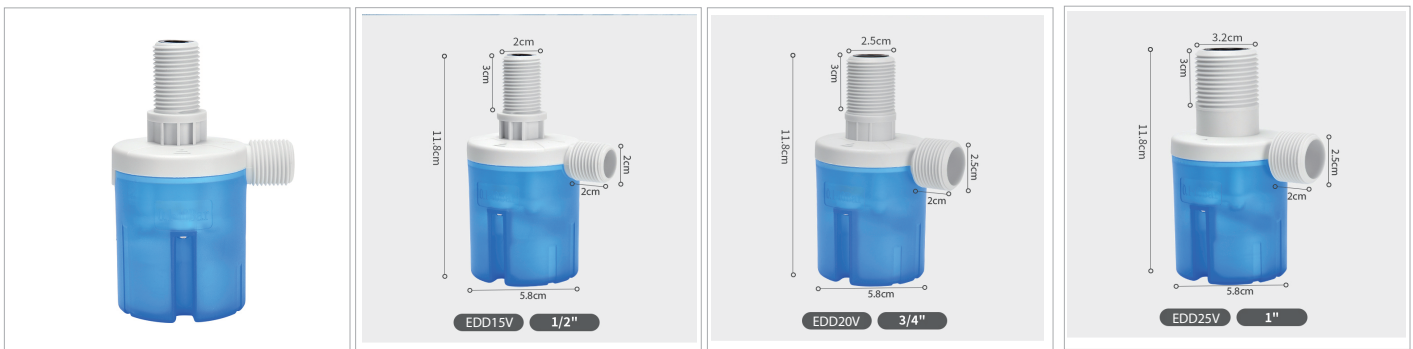

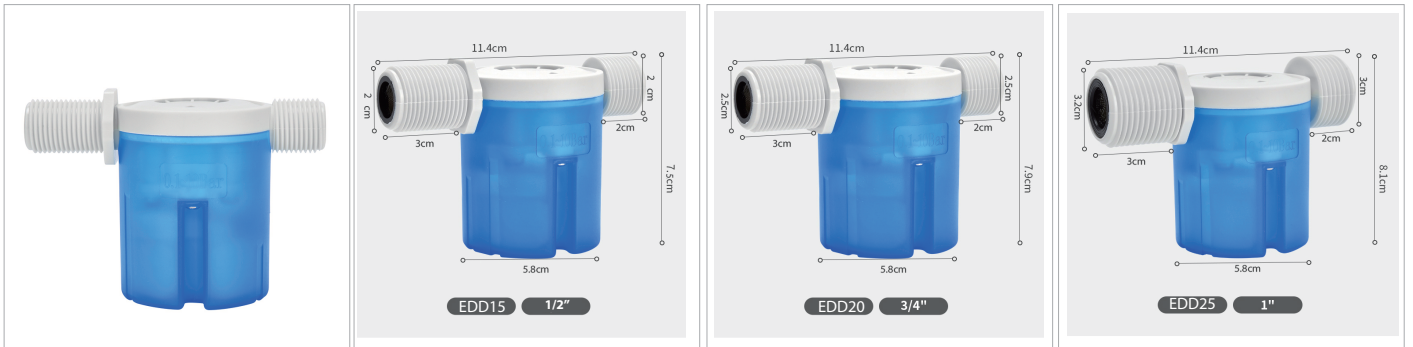

SAY BYE-BYE TO TRADITIONAL FLOAT VALVE

OLD FLOAT VALVE

- ⊗ Big Body
- ⊗ Short Life
- ⊗ Small Flow
- ⊗ Rust Easily
- ⊗ Unrepairable
- ⊗ Small Application

AUTOMATIC WATER LEVEL CONTROL VALVE(INSIDE TYPE) 3rd Update Transparent Type

SPECIFICATION

MODEL	SIZE	INSTALLATION	TEMPERATURE	WORK PRESSURE
EDD15	1/2"	Horizontal	≤120	0.01~1.0MPa 0.1~10Bar 1.5-150PSI
EDD20	3/4"	Horizontal		
EDD25	1"	Horizontal		
EDD15V	1/2"	Vertical		
EDD20V	3/4"	Vertical		
EDD25V	1"	Vertical
